Projects

E-Commerce Website(Style-Stamp) - stylestamp.dipenoverseas.com

In this project my role was back-end developer. I used PHP language with a CodeIgniter framework I used MySQL database. As a back-end team we developed an admin site of e-commerce business and APIs for android application. During this project i experienced tools like github and project management methods SCRUM and project management tool Trello and JIRA.

By using this website anyone can do shopping of clothes and other accesories.

Space Invaders Game

I made this game in the C# language. I made this game using Visual Studio tool. we were two member in group and we did everything needed for the game from designing to coding. I experienced different type of error resolving solution during this project.

User can play this game in console and can see their score.

Restaurant Website(Valentino)

I made this restaurant website with PHP language using Visual studio. It was my first project in IT. I worked as front-end and back-end developer in this project. I did the designing using HTML and CSS. I used MySQL database to store the data.i also used MVC in this project.

Anyone can book table for them selves by this website. And also put any message that they want on their table.

Other Experience

Supervisor

Tim Hortons, Montreal

Supervise every employee's work and need to maintain store.
I need to do orders as per store requirements.

Fund Raiser

Urban Care, India

Organized many function to raise fund for poor and needy peoples to provide them food and clothes etc.
